STORAGE TIPS

Suggestions to make the most of your storage unit:

- ▶ Place large items and furniture toward the back of the storage unit.
- ▶ Label boxes for easy identification, and place your most accessed items near the front.
- ▶ Stack boxes heaviest on bottom to lightest on top to prevent boxes from being crushed.
- ▶ Dressers can be stacked with the top one turned giving flat-to-flat surfaces.
- ▶ Couches can be turned on their end to utilize upward space and increase floor space.
- ▶ A sheet of plywood may be placed upon even stacks to disperse weight & stack items higher.
- ▶ Mattress covers, sofa covers, or plastic sheets prevent dust from settling on furniture.
- ▶ Leaving a path down the middle of the unit eases access to items at back of unit.
- ▶ Place a barrier beneath equipment/machinery such as mowers, chainsaws or vehicles to prevent drips and leaks onto the concrete floor or onto your stored items.
- ▶ Pack items carefully in appropriate boxes or containers to avoid damage.
- ▶ Use gloves or other protective gear when necessary to handle sharp items.

Things to avoid while storing items:

- ▶ Never store flammables, combustibles, or hazardous chemicals in your storage unit.
- ▶ Never store perishables, food items, or compost materials in your storage unit.
- ▶ Do not stack items in a manner in which they could tip or fall.
- ▶ Don't lift more than you are comfortable with. Bring help for large or heavy items.
- ▶ It is best not to have clothing or smaller items loose, outside of containers.
